Hyderabad, India · Open to relocation & remote

PROFESSIONAL SUMMARY

UI/UX and product designer with 3+ years of freelance experience shipping 12 client projects end to end for remote clients — SaaS dashboards, e-commerce and marketing sites — with a 100% on-time record and 80% of clients returning or referring. Works in Figma from research and wireframes to high-fidelity interactive prototypes and design systems, and can prototype and build in code. B.Tech in AI & Data Science (2026). Open to relocation and remote roles.

CORE COMPETENCIES

Figma | UI & UX Design | Product Design | Design Systems | Wireframing | Interactive Prototypes | User Research | Usability Testing | Interaction Design | Accessibility (WCAG) | Developer Handoff

WORK EXPERIENCE

Freelance UI/UX & Product Designer

2023 – Present

Self-employed · Remote clients

Hyderabad, India · Remote

- Shipped **12 client projects end to end** across SaaS dashboards, e-commerce flows and marketing sites as the sole designer: scoping, research, user flows, hi-fi UI in Figma and developer handoff.
- Delivered **100% of projects on time** against fixed scopes and dates agreed up front; **80% of clients** returned for more work or referred others.
- Built and maintained design systems and component libraries so each product stayed consistent as screens were added.
- Ran user interviews and usability tests with real users and turned the findings into revised flows before launch.

SELECTED PROJECTS

T Vastra — e-commerce store

Client project

Premium black storefront for an Indian embroidered-tee label. Directed and designed it, then built it with AI-assisted tools. Signature colour-change interaction drawn as live SVG across 12 products × 16 colourways; product-card micro-interactions with designed error states, a reduced-motion fallback and a keyboard-accessible bag drawer. Independent code review and scripted browser tests caught 8 bugs, all fixed before handover.

Art direction · Interaction Design · E-commerce UX · Accessibility · HTML/CSS/JS

Tone Zone Fitness — gym-management app

Client project

Member and owner apps in one: designed the end-to-end UI and a dark, high-contrast design system (colour tokens, typography, reusable components) across member and admin screens — login, a QR membership pass, UPI payment, an admin scanner with a one-glance check-in card, member approvals and a revenue / unpaid-members dashboard. Built in Flutter (Material 3) for iOS and Android.

UI Design · Design System · Material 3 · Interaction Design

Daily Recall — reading-retention app

Case study

Designed and built the capture → insight → recall loop (AI summaries, a word game and spaced flashcards from one scanned page). Validated demand (17M+ views on the core question), interviewed 9 target users, and shipped a working app across two test-and-redesign cycles.

User Research · Usability Testing · Prototyping · Information Architecture · Figma

EDUCATION

B.Tech, Artificial Intelligence & Data Science — Guru Nanak Institute of Technology

2022 – 2026

Hyderabad, India · CGPA 7.3 / 10

CERTIFICATIONS

Google UX Design Professional Certificate (Coursera) · Product Design: From Idea to Execution (LinkedIn Learning) · Web Design for Web Developers (Udemy)

SKILLS

Tools: Figma (primary), Framer, Rive, Adobe Photoshop, Illustrator, XD, After Effects · **AI:** Figma AI, Framer AI, Adobe Firefly · **Code:** HTML, CSS, JavaScript

Design: Wireframing, prototyping, design systems, information architecture, interaction design, user research & interviews, usability testing, accessibility, responsive & mobile-first design
